

A summary of frequently asked questions and common themes raised during

	Area	Question	Answer
1.	Support services	Will planning consider specific needs for support services, including decontamination?	All non-clinical services are included in Workstream C and the workshop process will establish the specific needs and space required for services.
2.	Allied Health Professionals (AHPs)	How will AHPs be involved in both projects? Noting the range of AHP services currently delivered from the site.	There will be AHP representatives in all clinical workstreams where services provided. The project team will liaise with AHP lead to identify the most appropriate individual.
3.	Existing building issues	How will any existing building issues be dealt with?	Estates will pick up any current issues through the GP premises group.
4.	Engagement with hospice	There are some immediate opportunities we would be keen to discuss further with NHS Forth Valley and the Health and Social Care Partnerships.	Representative included in stakeholder group for workstream A, bedded care.
5.	GP premises ownership	Will GPs with owned premises be included?	Specific representation via GP sub-committee. One related driver of the work is the GP Code of Contact and shift from GP owned to board owned premises.
6.	Ophthalmology	Are all areas of Ophthalmology included?	Yes, Ophthalmology leads identified from all elements of care – day case and outpatient and community optometry.
7.	Offices accommodation	There is a wide range of staff based in offices at FC site, how will they be involved in the project?	Early work will identify total numbers of desks/staff based there. Lead identified for staff groups based at Falkirk Community Hospital.
8.	Green spaces	How will green spaces be considered to compliment new models of care and support?	Greenspace will absolutely be considered as we go forward. Health Promotion has been included as stakeholder

9.	Health Promotion	Will there be opportunities to involve Health Promotion Services in Stakeholder workshops to engage in discussions such as those around greenspaces and wellbeing?	Health promotion included in workshop stakeholders.
10.	Transport links	How will transport be considered, taking into account people travelling from across the Forth Valley area.	A travel plan will be developed.
11.	Resuscitation equipment	How will provision of resus equipment be considered?	It's early stages for that detail but we will pick up in the discussion going forward.
12.	Palliative & End of Care	Note: We have just completed a strategic review of Palliative and End of life Care and would be able to inform this vital aspect of planning.	Project will look to engage with P&EOLC team
13.	Place principled 20-minute neighbourhood.	There is an opportunity to align this work with investment plans to enable fuller alignment of services, enhanced provision for our communities and an improved sense of place. This includes reference to place standards, active travel, and greenspace. We therefore need to resolve if we are seeking a single building or a framework for alignment with other provision.	Workshop engagement will include representatives from localities. As the project moves through the business case process towards tangible delivery solutions the consideration of Place principles will be adopted where appropriate and feasible.
14.	Health Records Services accommodation	Note: Health Record Services have a substantial footprint in FCH for both staff and case note storage.	Health records added to stakeholder list
15.	Staff side involvement	Could staff side representation be included in the wider stakeholder list?	Staff side representation added to wider stakeholder list.
16.	Availability of slides	Are the slides going to be available for future reference.	Yes, slides and FAQs will be posted onto the intranet along with recording of meeting
17.	Links with Bellfield	Will there be opportunity for staff working in Bellfield to be involved?	Yes, will pass request to project team

18.	Vaccination programme	Lots to consider and a significant task. Makes sense to consider need for spaces that can be used for large scale vaccination programmes in the plans where possible to avoid need for external venues and often hefty costs	Workstreams will consider the impact of Vaccination Transformation programme and specific requirements
19.	Women & Children's services	We have several Women and Children Services on site so just need to make sure these are captured in entirety. There are also services e.g. CAMHS that would benefit from coming onto that site if that's a possibility.	One part of the process is looking at that very thing, what is elsewhere with a need that could be addressed by being included in the development. Women & Children representatives within workstream B, ambulatory care.
